Enterprise Development with Flex: Best Practices for RIA Developers (Adobe Developer Library)

Yakov Fain, Victor Rasputnis, Anatole Tartakovsky

If you want to use Adobe Flex to build production-quality Rich Internet Applications for the enterprise, this groundbreaking book shows you exactly what's required. You'll learn efficient techniques and best practices, and compare several frameworks and tools available for RIA development -- well beyond anything you'll find in Flex tutorials and product documentation. Through many practical examples, the authors impart their considerable experience to help you overcome challenges during your project's life cycle.

Enterprise Development with Flex also suggests proper tools and methodologies, guidelines for determining the skill sets required for the project, and much more.

- Choose among several frameworks to build Flex applications, including Cairngorm, PureMVC, Mate, and Clear Toolkit
- Apply selected design patterns with Flex
- Learn how to extend the Flex framework and build your own component library
- Develop a sample AIR application that automatically synchronizes local and remote databases to support your sales force
- Get solutions for leveraging AMF protocol and synchronizing Flex client data modifications with BlazeDS-based servers
- Determine the actual performance of your application and improve its efficiency

Wayne Kong:

Your reading 6th sense will not betray an individual, why because this Enterprise Development with Flex: Best Practices for RIA Developers (Adobe Developer Library) guide written by well-known writer who knows well how to make book that could be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your personal hunger then you still uncertainty Enterprise Development with Flex: Best Practices for RIA Developers (Adobe Developer Library) as good book not merely by the cover but also by the content. This is one publication that can break don't assess book by its handle, so do you still needing one more sixth sense to pick that!?! Oh come on your reading sixth sense already told you so why you have to listening to yet another sixth sense.

David Murray:

As a college student exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just small students that has reading's heart or real their interest. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this Enterprise Development with Flex: Best Practices for RIA Developers (Adobe Developer Library) can make you truly feel more interested to read.
