System Identification: A Frequency Domain Approach Rik Pintelon, Johan Schoukens

Electrical Engineering System Identification A Frequency Domain Approach How does one model a linear dynamic system from noisy data? This book presents a general approach to this problem, with both practical examples and theoretical discussions that give the reader a sound understanding of the subject and of the pitfalls that might occur on the road from raw data to validated model. The emphasis is on robust methods that can be used with a minimum of user interaction. Readers in many fields of engineering will gain knowledge about: Choice of experimental setup and experiment design Automatic characterization of disturbing noise Generation of a good plant model Detection, qualification, and quantification of nonlinear distortions Identification of continuous- and discrete-time models Improved model validation tools and from the theoretical side about: System identification Interrelations between time- and frequency-domain approaches Stochastic properties of the estimators Stochastic analysis System Identification: A Frequency Domain Approach is written for practicing engineers and scientists who do not want to delve into mathematical details of proofs. Also, it is written for researchers who wish to learn more about the theoretical aspects of the proofs. Several of the introductory chapters are suitable for undergraduates. Each chapter begins with an abstract and ends with exercises, and examples are given throughout.

From reader reviews:

Jennifer Case:

Hey guys, do you would like to finds a new book to study? May be the book with the concept System Identification: A Frequency Domain Approach suitable to you? The book was written by well known writer in this era. Typically the book untitled System Identification: A Frequency Domain Approach is the main of several books this everyone read now. This kind of book was inspired a number of people in the world. When you read this e-book you will enter the new way of measuring that you ever know before. The author explained their concept in the simple way, consequently all of people can easily to recognise the core of this publication. This book will give you a large amount of information about this world now. In order to see the represented of the world with this book.

Richard Kitterman:

The publication with title System Identification: A Frequency Domain Approach has a lot of information that you can understand it. You can get a lot of benefit after read this book. This specific book exist new knowledge the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. That book will bring you in new era of the syndication. You can read the e-book on the smart phone, so you can read that anywhere you want.

David Black:

Playing with family in a park, coming to see the marine world or hanging out with close friends is thing that usually you might have done when you have spare time, and then why you don't try factor that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of knowledge. Even you love System Identification: A Frequency Domain Approach, it is possible to enjoy both. It is excellent combination right, you still wish to miss it? What kind of hang-out type is it? Oh can occur its mind hangout guys. What? Still don't buy it, oh come on its known as reading friends.

David Rivera:

As a pupil exactly feel bored in order to reading. If their teacher expected them to go to the library or even make summary for some publication, they are complained. Just minor students that has reading's spirit or real their passion. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that studying is not important, boring as well as can't see colorful photos on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this System Identification: A Frequency Domain Approach can make you experience more interested to read.
