Design in Nature: Learning from Trees Claus Mattheck

The chicken bone you nibbled yesterday and threw away was a high-tech product! Not only that: it was a superlative light-weight design, functionally adapted to its mechanical requirements. No engineer in the world has, as yet, been able to copy this structural member, which is excellently optimized in its external shape and its internal architecture as regards minimum weight and maximum strength. The tree stem on which you recently carved your initials has also, by life-long care for its body, steadily improved its internal and external structure and adapted optimally to new loads. In the course of its biomechanical self-optimization it will heal up the notch you cut as speedily as possible, in order to repair even the smallest weak point, which might otherwise cost it its life in the next storm. This book is dedicated to the understanding of this biomechanical optimization of shape. It is the synthesis of many years of extensive research using the latest computer methods at the Karlsruhe Research Centre to help understand the mechanism of biological self-optimization (adaptive growth) and to simulate it by computer. The method newly developed for this purpose was called CAO (Computer-Aided Optimization). With this method, it is possible to predict the growth of trees, bones and other biological structures from the tiger's claw to the sea urchin's skeleton.

From reader reviews:

Margaret Morales:

What do you consider book? It is just for students because they're still students or it for all people in the world, the particular best subject for that? Only you can be answered for that issue above. Every person has several personality and hobby for each and every other. Don't to be forced someone or something that they don't desire do that. You must know how great and also important the book Design in Nature: Learning from Trees. All type of book is it possible to see on many options. You can look for the internet methods or other social media.

Ashley Davis:

In this 21st century, people become competitive in each way. By being competitive right now, people have do something to make these people survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to stay than other is high. For you personally who want to start reading a book, we give you this specific Design in Nature: Learning from Trees book as nice and daily reading e-book. Why, because this book is more than just a book.

George Hughes:

Here thing why this Design in Nature: Learning from Trees are different and dependable to be yours. First of all reading a book is good however it depends in the content of the usb ports which is the content is as tasty as food or not. Design in Nature: Learning from Trees giving you information deeper and different ways, you can find any book out there but there is no publication that similar with Design in Nature: Learning from Trees. It gives you thrill examining journey, its open up your own eyes about the thing that will happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in recreation area, café, or even in your way home by train. For anyone who is having difficulties in bringing the published book maybe the form of Design in Nature: Learning from Trees in e-book can be your substitute.

Curt Hall:

The reserve with title Design in Nature: Learning from Trees contains a lot of information that you can discover it. You can get a lot of help after read this book. This kind of book exist new understanding the information that exist in this reserve represented the condition of the world at this point. That is important to you to be aware of how the improvement of the world. This particular book will bring you with new era of the syndication. You can read the e-book on your own smart phone, so you can read it anywhere you want.
