## **African Art** Ezio Bassani

An illustrated study of traditional and figurative art of Africa that reflects the continent's rich artistic and cultural heritage. *African Art* explores the continent's marvelous artistic achievements which share its roots with humanities origins. Sculpture has historically been the chief means of artistic expression. The human figure, whether real or symbolic, is almost the exclusive subject of African art. This vast world of African sculpture is the result of an evolutionary process, based on humanity's rich history and diversity deriving from migrations, wars, and alliances. During the last century, the African continent has experienced radical transformations in the fields of social and political organizations, the economy and religions. Inevitably, new artistic forms are being established simultaneously with the globalization process and the creation of works for the art market, which retain less and less ties with those of the past. *African Art* is an exhaustive presentation of the traditional figurative arts of Africa and concisely explains their distinguishing historical, formal, symbolic and functional characteristics. A truly valuable source of inspiration for students, collectors, and travelers alike, this book is complete with a glossary and bibliography.
