**Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials)** Jin Kuk Kim, Kaushik Pal

Wood-plastic composite (WPC) is a non-recyclable composite material lumber or timber made of recycled plastic and wood wastes which has become one of the most dynamic sectors of the plastics industry in this decade. It is used in numerous applications, such as, outdoor deck floors, railings, fences, landscaping timbers, park benches, window and door frames. This book starts with a brief glimpse at the basic structures and properties of WPCs. Aspects such as surface treatment, machinery used and testing types of WPCs are also covered. The following chapters of the book give a view of foam technology, flame retardant properties and colour retardant properties of WPCs. The way morphology affects or controls the physical and mechanical behaviours of the finished materials is discussed. Finally, the authors give an overview of the applications of wood-plastic composites in daily life. The book may serve as a source book for scientists wishing to work in this field.

### **From reader reviews:**

#### **Gerald Dews:**

Book will be written, printed, or outlined for everything. You can recognize everything you want by a reserve. Book has a different type. We all know that that book is important issue to bring us around the world. Close to that you can your reading ability was fluently. A reserve Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) will make you to end up being smarter. You can feel considerably more confidence if you can know about every little thing. But some of you think this open or reading a new book make you bored. It isn't make you fun. Why they can be thought like that? Have you seeking best book or suitable book with you?

#### **Kevin Kennard:**

This Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) book is just not ordinary book, you have after that it the world is in your hands. The benefit you will get by reading this book is definitely information inside this publication incredible fresh, you will get data which is getting deeper you read a lot of information you will get. This specific Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) without we realize teach the one who reading it become critical in thinking and analyzing. Don't become worry Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) can bring any time you are and not make your carrier space or bookshelves' grow to be full because you can have it inside your lovely laptop even cellphone. This Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) having great arrangement in word as well as layout, so you will not sense uninterested in reading.

#### **Mary Mohammad:**

Nowadays reading books be a little more than want or need but also turn into a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge the actual information inside the book which improve your knowledge and information. The details you get based on what kind of reserve you read, if you want attract knowledge just go with education and learning books but if you want feel happy read one along with theme for entertaining like comic or novel. The actual Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) is kind of publication which is giving the reader erratic experience.

#### **Sandra Birk:**

Information is provisions for anyone to get better life, information today can get by anyone on everywhere. The information can be a information or any news even a problem. What people must be consider if those information which is within the former life are difficult to be find than now could be taking seriously which one is suitable to believe or which one typically the resource are convinced. If you get the unstable resource then you have it as your main information you will have huge disadvantage for you. All those possibilities

will not happen throughout you if you take Recent Advances in the Processing of Wood-Plastic Composites (Engineering Materials) as the daily resource information.
