## Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series)

In recent years, understanding of microRNA (miRNA) biogenesis, the molecular mechanisms by which miRNAs regulate gene expression, and the functional roles of miRNAs has expanded. **Mapping of Nervous System Diseases via MicroRNAs** provides an up-to-date review on the function of miRNA in neurological diseases as well as advancements in technology for therapeutic modulation of miRNA activity.

MicroRNAs are small RNA molecules that regulate gene expression post-transcriptionally. A growing body of evidence suggests that miRNAs are dysregulated in several neurological disorders. In addition to reviewing general concepts and novel insights on brain function in relation to miRNA, this book also examines the role of miRNA in:

- Neurological diseases
- Neurodegenerative diseases
- Neuropsychiatric diseases
- Neurodevelopmental diseases

The book also discusses the significance of miRNAs as diagnostic tools, biomarkers, agents, and targets in the detection and treatment of neurological diseases. Each chapter contains material regarding future diagnostic and therapeutic advances.

Molecular and cellular neurobiological studies of miRNA-mediated gene silencing in the nervous system have opened new frontiers for the development of new diagnostic tests and genetic therapies for neurological diseases. Covering the full range of relevant concepts and giving a look into present and future possibilities, **Mapping of Nervous System Diseases via MicroRNAs** is a necessary cutting-edge reference for neurologists, neuropathologists, and researchers and practitioners in a wide range of related fields.

### **From reader reviews:**

#### **Sheila Donovan:**

Have you spare time for just a day? What do you do when you have much more or little spare time? Yep, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a wander, shopping, or went to the Mall. How about open as well as read a book called Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series)? Maybe it is to get best activity for you. You recognize beside you can spend your time with the favorite's book, you can more intelligent than before. Do you agree with the opinion or you have additional opinion?

#### **Michael Palmateer:**

Often the book Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series) will bring you to definitely the new experience of reading some sort of book. The author style to describe the idea is very unique. If you try to find new book you just read, this book very suited to you. The book Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series) is much recommended to you to read. You can also get the e-book from your official web site, so you can more easily to read the book.

#### **Delaine Valencia:**

Playing with family inside a park, coming to see the ocean world or hanging out with pals is thing that usually you might have done when you have spare time, then why you don't try issue that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series), you could enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't obtain it, oh come on its referred to as reading friends.

#### **Cynthia Tso:**

Many people said that they feel uninterested when they reading a book. They are directly felt the idea when they get a half regions of the book. You can choose the book Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series) to make your own reading is interesting. Your own skill of reading proficiency is developing when you just like reading. Try to choose straightforward book to make you enjoy you just read it and mingle the opinion about book and studying especially. It is to be initial opinion for you to like to open up a book and study it. Beside that the guide Mapping of Nervous System Diseases via MicroRNAs (Frontiers in Neurotherapeutics Series) can to be a newly purchased friend when you're really feel alone and confuse with what must you're doing of this time.
