## **Model Ships from Scratch** Scott Robertson

Model ship building does not have to be an expensive hobby. The author of this book takes you on a journey through one of the oldest crafts - nowadays a hobby - and shows you how you can build an end product of fascination, history, skill and value using low-cost materials and a minimum of tools - "from scratch" in fact. The book begins by explaining hull lines and hull construction methods and then moves on to: masts, yards, booms and gaffs; deck equipment and furniture; anchors; painting; rigging and blocks; armament; simple sail making; mounting and displaying the finished model.

The text is packed with useful hints and tips derived from the author's lifetime of modelling which, together with the large number of detailed drawings and photographs depicting many of the ship models in his collection, some showing useful close-ups on details and fittings, provides a very practical guide to the art and craft of model ship building.

This book is authorized for sale only in United States and its territories and possessions and in Canada.
