## Voice and Environmental Communication (Palgrave Studies in Media and Environmental Communication)

*Voice and Environmental Communication* explores how people give voice to, and listen to the voices of, the environment. As anxieties around degrading environments increase, so too do the number and volume of voices vying for the opportunity to express their experiences, beliefs, anxieties, knowledge and proposals for meaningful change. Nature itself speaks through, and perhaps to, individuals who advocate on behalf of the environment. This collection includes nine original essays organized into three sections: Voice and Environmental Advocacy, Voice and Consumption, and Listening to Non-human Voices. Four notable scholars reflect on these chapters, and provide both an audience to the scholars as well as a forum for extending their own understanding of voice and the environment. This foundational book introduces the relationship between these two fundamental aspects of human existence and extends our knowledge of the role of voice in the study of environmental communication.
