Death Is Not So Bad!: On the Future of the Music and Media Industry Tim Renner

When Tim Renner applied to the German record company Polydor in 1986, he intended to write an exposé about the music industry. However, things went differently and he turned this exposé into a career. For eighteen years his biography has been intermeshed with the development of the music industry, he led bands like Element of Crime, Rammstein, Tocotronic and Philip Boa to success. He raised up higher and higher on the ladder, finally reaching the top of Universal Music Germany. He witnessed how musical development has been hampered by the pressure of the markets, how pop and commerce diffused, and importantly, he witnessed the rapid dissolution of old commercial structures through the forces of digitalization and globalization. But the ponderous giant labels kept their eyes shut in front of these developments and Renner finally quit. After his leave from Universal in 2004 he described his point of view on what he found were wrong tracks and challenges of contemporary pop music.

"Death is not bad!" is a profound analysis of culture and music in times of digitalization, based on the vision that creativity, consumption and capital could find a way of coexistence.

Ten years after the German edition of this book was published some passages read like a history book about a long forgotten time. Some passages pointing to developments which are fully manifested today and look to evolve further in the future. The book shows the changes of a whole industry and the first steps of a society on its way into the digitalized future.
