**Engineering Science** W. Bolton, Bill (William) Bolton

**Engineering Science** is a comprehensive textbook suitable for all vocational and pre-degree courses. Taking a generic approach, the essential scientific principles engineering students need for their studies are presented topic by topic. Unlike the majority of texts available on this subject, Bill Bolton goes beyond the core science to include the mechanical, electrical and electronic principles needed in the majority of courses.

A concise and accessible text is supported by numerous worked examples and problems, with a complete Answer Section at the back of the book. Now in its fifth edition, the text has been fully updated in line with the current BTEC National syllabus and includes a grid mapping the chapters to the BTEC units. The breadth of coverage means this fifth edition will also prove an essential reference for students embarking on HNC and Foundation Degrees, who require a general introduction to this subject area.

New for this edition is online lecturer support available from <http://textbooks.elsevier.com> and featuring:

- Key points, definitions and equations from the book for use as handouts
- Multiple Choice Questions
- Answers to the Multiple Choice Questions
- PowerPoint slides featuring essential illustrations per topic area for use in lectures or as handouts

#### **Stephen Lee:**

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading critically. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore this Engineering Science can make you really feel more interested to read.
