## **Innovation in European Freight Transportation: Basics, Methodology and Case Studies for the European Markets (RWTHedition) Eva Savelsberg**

Serious problems and risks can be observed in European freight transportation development. However, the transport and logistics sector shows a lack of tradition in utilising systematic innovation management to overcome these problems. Hence, this volume puts forward a specific and comprehensive Systemic Migration-Oriented Innovation Management Method. Within the scope of this research, seven case studies of European freight transport innovations have been conducted using this method. They offer a broad, comprehensive and up-to-date view concerning different carriers, degrees of automation, and corridors across Europe. These case studies demonstrate how implementations of innovations may be performed successfully.
