Visions of the Future is a collection of stories and essays including Nebula and Hugo award-winning works. In this anthology, you'll find stories and essays about artificial intelligence, androids, faster-than-light travel, and the extension of human life. You'll read about the future of human institutions and culture. But these literary works are more than just a reprisal of the classical elements of science fiction and futurism. At their core, each of these pieces has one consistent, repeated theme: us.

Other Lifeboat Foundation books include "The Human Race to the Future: What Could Happen - and What to Do" and "Prospects for Human Survival".
